ABOUT ME

A passionate programmer and ambitious problem solver, who would like to join a team of like-minded developers.

I have much experience of creating logical and innovative solutions to complex problems.

I have a keen interest in technology, mobile applications, seo and user experience.

I have a long experience as a professional web developer, and i am capable of all aspects of mobile web

development and have worked in my current position with frameworks like Laravel Symfony and Codeigniter.

I have a lot of experience working with WordPress CMS from building complex plugins (custom fields , improvement of queries , BodyPress Modules,) and responsive themes. In my process of creating wordpress plugins i try to use open source boilerplates like DevinVinson/WordPress-Plugin-Boilerplate and for custom themes tools like redux framework.

Right now I'm looking for a suitable position as a specialized Web Developer with a company where

outstanding performance is recognized and where i can work on a complex long term project.

My Knife Tools:

- Laravel
- Vagrant
- PHPStorm
- GIT
- AngularJS / jQuery
- Bootstrap/ Foundation

WORK EXPERIENCE

Iris WorldWide
Lead Developer

March 2017 — Present

Katana / London
Senior Developer

May 2014 — November 2016

Extending the agency engine (OctoberCMS - Modular Laravel / ORM - CMS)

- AWS Deployment

Software developed cronos a web scrapped that was parsing website with news and made a lot of lexical

procesing using bayesian alghorithm.

Projects Android: <https://play.google.com/store/apps/details?id=air.ro.asur.ScienceCalendarRO&hl=ro>

Tehnologies used: PHPOOP, MYSQL, JAVA, ANDROID SDK • Software Used: Adobe

Photoshop, Adobe

Fireworks, Eclipse,

EDUCATION

Computer science

Oct 2008 — Aug 2012

Spiru Haret

INTERESTS

- WordPress
- BuddyPress
- Facebook API
- Twitch API
- ElasticSearch
- Android
- Arduino
- Symfony
- Laravel
- Codeigniter
- MYSQL
- JAVA
- C++
- OOP
- AI
- AngularJS
- SASS
- Bayesian Statistics

SKILL SET

CMS

I've used a lot of CMS for building websites but i can say that my first choice when getting the scope of work is to go with WordPress because of his simplicity.

I tend to use WordPress in the most complex ways from creating custom plugins or responsive themes, using tools like WP-CLI helps me improve my speed while coding the back-end side of an WordPress plugin and using frameworks helps me improve the speed while coding the front-end side.

Technology

Awareness of the Web Development industry, and new technologies.

Developing multi-user applications within a (SOA) service orientated architecture.

Writing up technical manuals and user instructions.

Knowledge of international web standards and protocols.

PHP Frameworks

Development of a Laravel & Codeigniter Framework

Developed Application with Codeigniter / AngularJS

Developed interactive web pages with jQuery and jQuery UI ,jQuery Mobile

Development of complex web applications with Zend 2 Framework + JQuery

Versioning

Source code version control with Subversion/GIT/Mercurial

IDE

PhpStorm,Eclipse,Aptana

Operating Systems

Mac OS X, Debian/Ubuntu and CentOS Linux, Windows

Server

Setup Google PageSpeed Plugin

Server Setup - Centos 6,7

Setup and management NGinx

Server Setup PHP lib & extensions

Setup and management PHP Daemon

Setup and management Redis & Memcached

Setup and management SMTP Server

Setup and management MongoDB Server

Setup and management FTP Server

Setup and management of Apache/Ngnix web server

Setup and management of MySQL Database Server

Setup and manage Server panels (Webmin, ISCP, Cpanel, VestaCP)
